

# **MicroTech-EFI**

## **ENGINE MANAGEMENT SYSTEMS**

### Repair / Reconfiguration Instruction Sheet

Please label all units or write your contact information clearly on the underside of the unit that needs testing/repairing/reconfiguring with a marker to help easily identify your ecu from the many we receive.

#### **\*\*\* International Customers \*\*\***

Please Note that if you are sending your units from outside of Australia, please make sure that you clearly fill out a Customs declarations form explaining that your goods are being returned to the country of origin for repair and the repair value is AUD\$200. This is **extremely important** to avoid any delays in turnaround and costly custom clearance fees that can be charged.

Please complete this form and send it with your units and post to:-
